Tiago Alvarez Schiaffino

FrontEnd Developer

Buenos Aires, Argentina.

Transforming ideas into code, crafting innovative solutions, and embracing new challenges.

Work Experience

Full-stack Web Developer & Designer
August 2023 to Present

- Developing an innovative "e-commerce" style website specialized in English language education. I have crafted a platform that provides detailed information about multiple English teachers, including their profiles with photos, descriptions, links to social media, and samples of their work.

FrontEnd Developer - "Wave"
No Country
August 2023 to Present

- Collaborated in an innovative social app, connecting users with shared interests (Movies, Video games, Music, etc.). Using TypeScript, Next.js, and the Zustand library to shape the UI and interactive features.
- Designed avatars, personalized chats, and "Zumbido"-inspired conversations for a nostalgic touch of "MSN".
- Implemented robust facial recognition for data verification, prioritizing user profile authenticity and security.
- Focused on privacy: concealed user identities, customizable interest-based pins for connections. Ensured user anonymity through the matching mechanism.

FrontEnd Developer - "Pocketpal"
No Country
June 2023 to July 2023

- Contributed to an innovative virtual wallet project as a FrontEnd Developer, using React JS and Axios for Back-End communication.
- Important role in FrontEnd layout, implementing relevant features including Login, SignUp, transfers, and deposits.
- Cooperate with responsive design to fit a better user experience for several devices.
- Collaborated in an agile project following Scrum methodology, focusing exclusively on Frontend development.
- Worked closely with all the team to define web functionalities and interaction as in FrontEnd components.
